

Adverse Event Report Form

Marketing authorisation holder: Coreline Pharmaceuticals Ltd, Unit 7 Fenway Court, Bramwich

A. Administrative information

REPORT REFERENCE AER-2026-00188-FU	DATE OF THIS REPORT 21 May 2026
TYPE OF REPORT Spontaneous	SERIOUS? Yes

B. Patient details

PATIENT INITIALS M.D.	AGE AT ONSET 71-year-old
SEX Female	WEIGHT 59 kg
RELEVANT MEDICAL HISTORY osteoarthritis, hypothyroidism	

C. Reporter details

REPORTER NAME Dr Rupert Ashgrove	QUALIFICATION Consultant Hepatologist
ORGANISATION Meadowvale District Hospital	COUNTRY United Kingdom

D. Suspect and concomitant products

PRODUCT NAME Fenaquil	DOSE AND FREQUENCY 500 mg up to three times daily
ROUTE OF ADMINISTRATION ORAL	BATCH / LOT NUMBER FNQ-2210A
THERAPY START DATE 17 April 2026	ROLE Suspect

E. Adverse reaction

REACTION REPORTED acute hepatitis	DATE OF ONSET 2 May 2026
OUTCOME Not recovered	SERIOUSNESS CRITERIA HOSPITALISATION_OR_PROLONGATION

F. Case narrative

A 71-year-old female took Fenaquil 500 mg effervescent tablets for acute migraine over a two-week period. She presented on 2 May 2026 with jaundice and marked fatigue. Alanine aminotransferase was 640 U/L and total bilirubin 78 umol/L. She was admitted for five nights. Viral hepatitis serology was negative and there was no history of alcohol excess. Fenaquil was stopped on admission.

G. Relevant laboratory results

Test	Result	Units	Reference range	Flag
Alanine aminotransferase	640	U/L	10 – 40	H
Aspartate aminotransferase	412	U/L	10 – 35	H
Total bilirubin	78	umol/L	3 – 21	H
Alkaline phosphatase	196	U/L	30 – 130	H
Serum creatinine	94	umol/L	60 – 110	
Neutrophil count	3.8	x10 ⁹ /L	2.0 – 7.5	
Haemoglobin	131	g/L	120 – 160	
C-reactive protein	42	mg/L	< 5	H

Laboratory results (continued, sheet 2)

Test	Result	Units	Reference range	Flag
Alanine aminotransferase	640	U/L	10 – 40	H
Aspartate aminotransferase	412	U/L	10 – 35	H
Total bilirubin	78	umol/L	3 – 21	H
Alkaline phosphatase	196	U/L	30 – 130	H
Serum creatinine	94	umol/L	60 – 110	
Neutrophil count	3.8	$\times 10^9/L$	2.0 – 7.5	
Haemoglobin	131	g/L	120 – 160	
C-reactive protein	42	mg/L	< 5	H

Follow-up information was requested from the reporter on the date shown above. No further laboratory data was available at the time of this report.
