History: migraine with aura

SUSPECT DRUG

Fenaquil 500 mg as required

Route: oral Batch: FNQ-2210A

Started: last March

REACTION

dizziness

Onset: about two weeks later Outcome: recovering

Serious: no

NARRATIVE

I am a patient writing about myself. I was given Fenaquil last March for my migraines. About two weeks later I started getting very light-headed whenever I stood up, worst in the mornings. It is a bit better now but has not gone. I was born in 1966 if that helps.

REPORTED BY
